Re: MassHealth Section 1115 Demonstration Amendment Request

Dear Acting Secretary Hargan:

The undersigned organizations collectively represent millions of patients who are currently battling or who have fought serious, chronic, and life-threatening diseases. We write to express our opposition to the proposal in the Massachusetts 1115 waiver amendment to potentially limit access to new and innovative drug therapies by imposing a closed formulary with as few as a single drug per therapeutic class in MassHealth, the state's Medicaid program.

Prescription drugs have different indications, different mechanisms of action, and different side effects, depending on the person's diagnosis and comorbidities. Restricting MassHealth's drug benefits to a closed formulary would limit the ability of providers to make the best medical decisions for the care of their patients, effectively taking the clinical care decisions away from the doctor and patient and giving it to the state.

While we appreciate that the state will, when medically necessary, maintain an exceptions process to cover drugs not included on the formulary, the proposal fails to articulate the safeguards that will be put in place to ensure enrollees have access to the prescription drugs they need. Patients suffering from chronic, life-threatening conditions need a guarantee of uninterrupted access to the prescription drugs critical to maintaining or treating their disease. Disruptions in the treatment of serious and chronic conditions, including switching a patients' medication mid-treatment, could negatively impact their treatment and health outcomes.

Medicaid is a crucial source of coverage for thousands of Massachusetts residents with serious and chronic health care needs. This proposed amendment could severely restrict their access to critical therapies necessary to improve health outcomes. Therefore, we strongly urge the Centers for Medicare and Medicaid Services (CMS) to reject Massachusetts' 1115 demonstration amendment request in its current form.

On behalf of the millions of patients we represent, we stand ready to work with you to develop policies that will ensure individuals with serious and chronic conditions maintain access to innovative and medically necessary prescription drugs.

Thank you for your consideration of this important matter.

Sincerely,
