RARE DISEASE:

Any disease, disorder, illness or condition affecting fewer than

200,000

people in the United States is considered rare.¹

There are approximately

7,000

RARE DISEASES.²

More than

90%

of rare diseases are **WITHOUT** an FDA-approved treatment.⁹

It's estimated that

25-30

MILLION AMERICANS

(almost 1 in 10) have rare diseases.⁷

Most rare diseases are **genetic** or have a genetic component.³

For many rare diseases, signs may be observed at birth or in childhood.⁵

ALL PEDIATRIC CANCERS

are rare.⁸

There are more than

500

types of rare cancers.⁶

Many rare diseases result in premature deaths of infants and young children, or are fatal in early childhood.⁴
