The Honorable Patrick M. O'Connor, Ranking Minority Member  
*Senate Committee on Ways and Means*

Dear Budget Conferees,

We are writing, collectively, to express our support for the use of manufacturer copay assistance for prescription drugs in the Commonwealth. These vital programs allow thousands of Massachusetts patients to access the medications and treatments they need while helping with out-of-pocket costs. As you complete the Fiscal Year 2021 Budget, we respectfully request that the law allowing the use of manufacturer copay assistance in Massachusetts be extended to 2023.

In 2012, Massachusetts became the final state in the nation to enact legislation allowing patients to redeem prescription drug discount coupons at pharmacies to reduce co-pay costs. Before this legislation, these coupons were prohibited in the Commonwealth because of an outdated 1988 state law banning any rebate for health-care purchases. Unfortunately, patients are facing uncertainty surrounding this law, as it is scheduled to sunset in 2021 without legislative action.

Patients with chronic illnesses often face incredibly challenging financial decisions. Many must regularly choose between basic life necessities and the significantly high copays for the medications and treatments that allow them to manage their disease. These issues are more prominent than ever as Massachusetts patients continue to face significant financial hardships due to the COVID-19 pandemic. Studies show that when patients' out-of-pocket costs rise, many skip doses or stop taking medications altogether. This lack of adherence results in higher costs related to hospitalizations, ER visits, and long-term health issues.

Thousands of patients in Massachusetts have benefitted from money-saving copay assistance over the past eight years. These programs provide significant relief to patients facing increased out-of-pocket costs for their medications due to higher co-pays from coverage changes like high deductible health care plans. Discounts and coupons reduce their out-of-pocket burden, improve access to prescription medicines and innovative therapies, and help patients to stay on the medications they need. These programs could be lifesaving for patients who are struggling during these difficult financial times.

As you work to finalize the Fiscal Year 2021 Budget, we implore you to keep the needs of our patients in mind and extend the sunset date on the law authorizing the use of manufacturer copay assistance to 2023. These programs help thousands of patients avoid making their medical decisions based primarily on financial concerns, rather than their well-being and physicians' recommendations.

Thank you for your consideration.

Sincerely,
