NORD is working to establish well-organized, high-functioning Rare Disease Advisory Councils in every state to support the needs of the rare disease community.

An estimated 25-30 million Americans are living with a rare disease; that is close to one in ten people. Yet, with over 7,000 known unique rare diseases, it is difficult for state policymakers and government officials to have an in-depth understanding of the entire rare disease community. This lack of awareness contributes to common obstacles that rare disease patients face, such as delays in diagnosis, misdiagnosis, lack of treatment options, high out-of-pocket costs and limited access to medical specialists.

Rare Disease Advisory Councils (RDACs) demonstrate enormous promise to address these barriers for the rare disease community. With diverse membership and broad community support, RDACs can be a valuable resource for state governments as our health care system continues to advance. Without RDACs in place, state laws and regulations that affect the rare community will continue to be developed without the consultation of rare disease stakeholders, often leaving this vulnerable population at greater risk for poor health and economic outcomes. With strong RDACs, government officials and the rare disease community can partner together to develop the resources necessary to prevent and address barriers in a strategic way that allows states and their citizens to thrive.

In 2015, the first RDAC was created in North Carolina by patients, caregivers, families, and providers. Since then, rare disease advocates and stakeholders have sought councils in other states to help better represent their communities.

WHAT SHOULD YOU KNOW ABOUT FLORIDA’S RDAC EFFORT:

Senate Bill 272/House Bill 1373 has been introduced by Senator Dennis Baxley and Representative Bobby DuBose.

SB 272/HB 1373 will require the RDAC to:

- Develop recommendations for academic research institutions in the state to conduct research on rare diseases.
- Provide feedback to state agencies on issues that affect individuals with a rare disease.
- Create recommended strategies for health care providers on how to recognize and treat rare disorders.
- Solicit public comment to assist in developing recommendations on improving the treatment of rare diseases.

Email us at RDAC@rarediseases.org to get involved in the effort to get SB 272/HB 1373 signed into law!

It’s estimated that 25-30 MILLION AMERICANS (almost 1 in 10) have rare diseases

More than 90% of rare diseases are without an FDA-approved treatment.

Alone we are rare. Together we are strong.
NORD launched Project RDAC in November 2020 to optimize existing RDACs and help more states enact RDAC legislation. Through this work, NORD will develop tools and resources to help RDACs at every step of their journey based on feedback from the existing RDACs and rare disease community. Please check back here for additional information and updates on the project. For more, visit: rarediseases.org/rdac-overview

**HOUSED BY:**
- Department of Health
- Outside Nonprofit
- University
- Department/Caucus
- Grantee from Department of Health
- Department of Health and Department of Financial Services

**TYPE:**
- Council
- Advisory Commission
- Task Force
- Work Group
- Committee to DUR Board
- RDAC Sunset

NORD: Fighting for the rare community every day for more than 38 years.

NORD, a 501(c)(3) organization, is a patient advocacy organization dedicated to individuals with rare diseases and the organizations that serve them. NORD, along with its more than 300 patient organization members, is committed to the identification, treatment, and cure of rare disorders through programs of education, advocacy, research, and patient services.

The mission of NORD’s Rare Action Network® (RAN) is to connect and empower a unified network of individuals and organizations with the tools, training, and resources to become effective advocates for rare diseases through national and state based initiatives across the United States. To join RAN, go to rareaction.org.

For more information on Rare Disease Advisory Councils or NORD, please contact RDAC@rarediseases.org.
