**The National Organization for Rare Disorders (NORD)'s
Jayne Holtzer Rare Disease Research Grants Program
with funding from**

The APS Type 1 Foundation, Inc.

*Announces a research grant opportunity for one grant
up to \$50,000 US for*

Autoimmune Polyglandular Syndrome Type 1 (APS-1) Autoimmune Polyendocrinopathy Candidiasis Ectodermal Dystrophy (APECED)

DEADLINE FOR INITIAL APPLICATIONS: June 21, 2022 (11:59 pm PT)

NORD, with funding from the patient member organization, the APS Type 1 Foundation, is accepting applications for one grant, \$50,000 US, for scientific and/or clinical research studies related to Autoimmune Polyglandular Syndrome Type 1 (APS-1), also known as autoimmune polyendocrinopathy candidiasis and ectodermal dystrophy (APECED).

Autoimmune Polyglandular Syndrome Type 1 (APS-1) is a rare and complex inherited autoimmune condition. It presents as a group of symptoms including potentially life-threatening endocrine gland and gastrointestinal dysfunctions. The three classic manifestations of APS-1, which have been traditionally used to diagnose APS-1, are autoimmune hypoparathyroidism, adrenal insufficiency (Addison's disease) and chronic mucocutaneous candidiasis. Recent research from the NIH indicates that adding urticarial eruption, intestinal dysfunction, and enamel hypoplasia into the diagnostic criteria would result in earlier diagnosis. APS-1 patients are at increased risk of developing a myriad of other conditions, including, without limitation, gonadal failure, intestinal dysfunction, alopecia, pneumonitis and hepatitis. APS-1 is caused by pathogenic variants (mutations) in the autoimmune regulator (*AIRE*) gene and follows autosomal recessive inheritance in most patients but has also been reported to follow autosomal dominant inheritance.

Research Objectives

The NORD Rare Disease Research Grant Program was established in 1989 to encourage meritorious scientific and clinical studies designed to improve the diagnosis, understanding of underlying disease mechanisms, or therapy of specific rare diseases. For this RFP, studies related to Autoimmune Polyglandular Syndrome Type 1 (APS-1) / APECED will be considered. Grants will be awarded to qualified researchers to initiate small scientific research studies or clinical trials, the results of which could be used to obtain funding from the NIH, FDA, or other funding agencies, or to attract a corporate sponsor. Ideally, the proposed research should have the potential to lead to the ultimate development of a new or better therapy. Evaluation of proposals will include careful consideration of protocol design, objectiveness of parameters measured, and statistical evaluation proposed.

About NORD

The National Organization for Rare Disorders (NORD) is the leading independent advocacy organization representing all patients and families affected by rare diseases. NORD is committed to the identification, treatment and cure of the more than 7,000 rare diseases, of which approximately 90 percent are still without an FDA-approved treatment or therapy. Rare diseases affect 25-30 million Americans. More than half of those affected are children. NORD began as a small group of patient advocates that formed a coalition to unify and mobilize support to pass the Orphan Drug Act of 1983. For more than 35 years, NORD has led the way in voicing the needs of the rare disease community, driving supportive policies and education, advancing medical research and providing patient and family services for those who need them most. NORD is made strong together with over 300 disease-specific member organizations and their communities and collaborates with many other organizations on specific causes of importance to the rare disease patient community.

About the APS Type 1 Foundation

The APS Type 1 Foundation, Inc. is a 501(c)(3) organization whose mission is to support education, awareness and research in APS-1. With generous support from patients and families, this will be the foundation's 8th grant in collaboration with NORD. The foundation is supported by a medical advisory committee, which provides guidance to strengthen the APS-1 community and build capacity. The foundation also collaborates with a loosely formed scientific advisory committee, consisting of approximately 30 researchers and clinicians from around the globe.

NORD REQUEST FOR PROPOSALS: APS-1

APPLICATION PROCESS OVERVIEW

INITIAL APPLICATIONS

- Requests for proposals will be released by NORD.
- Letters of intent will be due June 21, 2022.
- Letters of intent will be reviewed by NORD reviewers.
- Requests for full proposals will be issued via email in early Fall of 2022.

FULL PROPOSALS

- Full proposal invitations will be issued via email.
- Application requirements for full proposals will accompany these invitations.

AWARDING OF GRANT

- Award announcements will be made via email and posted on NORD's website in December 2022.
- Funding will begin after all necessary documents (e.g., IRB forms, patient consent forms, signed grant agreements) have been received by NORD.

FURTHER INFORMATION

- If the study involves human or animal subjects, copies of governance documents will be required from each site involved in the study before payment can be issued.
- Clinical drug trials must meet requirements established by the U.S. Food & Drug Administration (FDA).
- Duplicate/overlapping funds from any other private or public source are not to be used.
- All applications determined to have scientific merit will be considered. However, before an award is issued, compliance with international funding regulations must be confirmed, when applicable.

INITIAL APPLICATION

Interested applicants should submit a completed application and letter of intent electronically to research-programs@rarediseases.org with "NORD Letter of Intent" as the subject line. Applicants can complete the requested information directly in the document provided below and/or merge any additional required documents into a single PDF file. Incomplete applications may not be considered. All applications must be received by **June 21, 2022 (11:59 pm PT)**.

REQUIRED ELEMENTS CHECKLIST	PAGE	✓

APPLICATION SUMMARY

Deadline for Initial Applications: June 21, 2022 (11:59 pm PT)

PRINCIPAL INVESTIGATOR INFORMATION	
Name	
Position/Title	
Email	
Mailing Address	
Telephone	
PROPOSAL INFORMATION	
Project Title	
Project Term	2 YEARS
Funding Amount Requested (\$ US) <i>not to exceed \$50,000 US</i>	
Institution(s) where research will be conducted	
City, State/Province, Country of Institution(s)	
Will research involve human subjects?	<input type="checkbox"/> YES <input type="checkbox"/> NO
Will research involve animals?	<input type="checkbox"/> YES <input type="checkbox"/> NO
How did you hear about this RFP?	<input type="checkbox"/> NORD <input type="checkbox"/> Academic Organization <input type="checkbox"/> Rare Disease Organization <input type="checkbox"/> Referral from Colleague <input type="checkbox"/> Other (please specify below)
Please be as specific as possible:	
Did you hear about this RFP via:	<input type="checkbox"/> NORD Website <input type="checkbox"/> Email <input type="checkbox"/> Google <input type="checkbox"/> Medical/Research Publication <input type="checkbox"/> Social Media <input type="checkbox"/> Rare Action Network (Facebook, Twitter, LinkedIn, Instagram) <input type="checkbox"/> Other (please specify below)
Please be as specific as possible:

LETTER OF INTENT

Please provide a Letter of Intent addressing the following elements of your research. Applicants may use the form below or attach a separate document to address the following details.

Letter of Intent (Not to exceed 2 pages)	
Summary Statement	
Statement of Need <ul style="list-style-type: none"> • What issue will the research address • Significance of the work • Why you have chosen this issue • Who will benefit from this research • Why this funding is essential 	
Project Activity <ul style="list-style-type: none"> • Overview of research activities • Why this approach is novel • How the research builds upon and differs from previous research (if applicable) 	
Credentials <ul style="list-style-type: none"> • Why your institution/program is best equipped to do this research 	
Closing	
Principal Investigator Signature REQUIRED

BIOGRAPHICAL SKETCH

Please provide a biographical sketch and bibliography for the principal investigator. Applicant may use this form or the NIH Biosketch form. Please modify the form to include, when applicable, the following:

Name Position/Title				
Education/Training Begin with baccalaureate or other initial professional education and include postdoctoral training.	Institution and Location	Degree	Year(s)	Field of Study
Research and Professional Experience Concluding with present position, list in chronological order previous employment, experience, and honors. Include present membership on any advisory committee.				
Honors and Awards				

CO-INVESTIGATOR(S)

Name of Co-Investigator	
Position/Title	
Institution	
Email	

Name of Co-Investigator	
Position/Title	
Institution	
Email	

Name of Co-Investigator	
Position/Title	
Institution	
Email	

BUDGET

Please provide a brief budget outline describing how the funding will be used. Do not include PI salary, overhead, or indirect costs. Funding can be used to cover expenses such as staff salary, technical assistance, supplies, and small equipment.

REVIEWER INFORMATION (OPTIONAL)

Please list up to five areas of scientific/medical expertise needed to review this application (optional). Do not list names of individuals.

- 1.
- 2.
- 3.
- 4.
- 5.

Please list below any individuals who should not review this application (optional).

NAME	INSTITUTION	JUSTIFICATION

LETTER OF SUPPORT (OPTIONAL)

Please include a letter of support for your research from an individual advocate (e.g., patient, care partner) or patient advocacy group in this disease space (optional, but encouraged).
