

## Rare Disease Day 2025 Social Media Toolkit

Rare Disease Day is an internationally recognized day and initiative to raise awareness, generate support and advocate for care and treatments for the 300 million people globally, including the 30 million Americans (about half of whom are children) who are living with a rare disease. It takes place annually on the last day of February. This year Rare Disease Day is February 28.

**Thank you for your support!**

### About #ShowYourStripes Campaign

This year the National Organization of Rare Disorders (NORD) #ShowYourStripes campaign has a goal to raise awareness and show support of the rare disease community.

The zebra serves as the official mascot for rare disease patients. Historically, medical professionals were told that when they, “hear hoofbeats,” they should expect a horse, not a zebra. We now know that 1 in 10 people in the U.S. have a rare disease. It might not be obvious when you look at us, which is one reason why we ‘show our stripes, so people don’t dismiss that some patients might be zebras. Every zebra’s stripes are unique, mirroring the uniqueness and complexity of the more than 10,000 individual rare diseases, each of which impacts people in distinct ways. Dressing in zebra stripes is a way to “show up” for 30 million Americans living with a rare disease, hence why we say #ShowYourStripes.

Whether wearing zebra-print outfits, painting stripes on your face, or baking striped cookies, the goal is to celebrate individuality of all ages. We ask you to leverage your social media platforms (via stories or feeds) to bring awareness to the day, encourage your followers to show their stripes, and highlight those who embody the spirit of the day.

### Official Hashtags

Please use #RareDiseaseDay and #ShowYourStripes in every post and tag NORD (see tags based on each platform below).

## Timing & Content Direction – When to Post

### Between February 21-27 – Countdown to Rare Disease Day!

Rare Disease Day is coming up! You can lead up to Rare Disease Day by doing the following:

- Publish 1-2 posts asking your followers to get ready for Rare Disease Day on February 28 and participate in the #ShowYourStripes campaign by wearing stripes in support of the 30 million Americans with a rare disease.
- Feel free to share a sneak peek of what you have planned or different options you are thinking about that can be suggested to your audience.

### February 28 – Rare Disease Day!

It's showtime! Today is the day to share a photo and show your stripes by doing the following:

- Encourage your followers to share their striped spirit by tagging you and NORD along with using #ShowYourStripes and #RareDiseaseDay hashtags.
- Recognize followers that are embodying the campaign in their ways by sharing your stories.

## Suggested Posts

The following posts can be used across **Facebook**, **Instagram**, **LinkedIn**, and **Twitter/X** and customized as you see fit. *For Instagram only, please remember to place the link in your bio or Linktree and direct users there, rather than placing the link in your post.*
